The substructure implant bar and preps for your new teeth!

The substructure implant bar and preps with individual Zirconia Crowns.

Substructure implant bar with milled individual Zirconia Crowns.

Final **INFINI-TEETH** Prosthesis.

**INFINI-TEETH** are the strongest, most functional, and aesthetic implant-supported prosthetic with a fiber-reinforced material that bends and flexes under stress on the market today! This combination results in an incredibly durable, beautiful prosthetic that looks and feels like your natural teeth.

### Lighter:

60% lighter than a full arch Zirconia and as gentle as natural dentition. Superior, lighter functionality means less stress is put on your dental implants. Its shock absorbing ability closely resembles the experience of natural teeth.

### Shock Absorbing:

The most flexible product available on the market and the only product that actually flexes in the mouth, so it's less likely to crack or fracture under stress.

### Fully Customizable:

**INFINI-TEETH** are fully customizable. Customize the color and shape of the teeth and the gums. Have a space or chip that is unique to your smile? We can customize your **INFINI-TEETH** to reflect your unique personality!
